Note: Systems below 1000L and above 5000L have been removed from the list but Comment 6 below applies.

**Key**

Key	Description	Material	Unit	Unit
AG	Above Ground	HDPE	High Density Polyethylene	hr
BG	Below Ground	MDPE	Medium Density Polyethylene	hr
SRC	Steel Reinforced Concrete	PE	Polyethylene	hr
GRC	Glass Reinforced Concrete	PP	Polypropylene	hr
SS	Stainless Steel	MCCS	Marine Coated Carbon Steel	hr
F	Fibreglass	I	Litres	hr

**Comments**

- For above ground installations, a non oil-emulsifying pump must be used with this infrastructure. Vortex type pumps and standard rpm helical rotor type pumps are considered to be oil-emulsifying pumps and are not authorised for use with this infrastructure  
 (Joint Committee Approval No. 96-0030 and 96-0031).
- Additional pre-treatment: Infrastructure is designed to also remove heavy metals, neutralise acidic wastes and disinfect.
- Related standard products: Skimmer device and 500 litre waste oil and solids storage tanks.
- The diaphragm pump must be used with this infrastructure. Vortex type pumps and standard rpm helical rotor pumps are considered oil-emulsifying pumps and are not authorised for use with this infrastructure.
- The use with solvents must be authorised by Queensland Urban Utilities on a site by site basis
- These companies also provide similar devices at sizes not shown on list. Devices with sizes not on the list may be authorised with a Trade Waste Consent assessed on a site by site basis. A Trade waste consent may be applied for on the Urban Utilities Web Site
