VRM Grease Trap	VRM 1000	750	AG	PE	27/07/2001	4/04/2002	G20	16			
	VRM 2000	1500	AG		27/07/2001	4/04/2002	G21				

Note: Passive systems below 1000L and above 5000L have been removed from the list but Comment 16 below applies.

Manufacturer's Name	Contact Name	Telephone	Model Name	Model Number	Capacity (litres)	Installation	Material	Date Submitted	Date Approved	Register Number	Comments
---------------------	--------------	-----------	------------	--------------	-------------------	--------------	----------	----------------	---------------	-----------------	----------

Key

AG	Above Ground	HPFC	High Performance Fibre –reinforced Concrete	PVC			Polyvinyl Chloride				
BG	Below Ground	HDPE	High Density Polyethylene	S			Steel				
SRC	Steel Reinforced Concrete	MDPE	Medium Density Polyethylene	MP			Megpoxy Coating				
GRC	Glass Reinforced Concrete	PE	Polyethylene	I			Litres				
SS	Stainless Steel	PP	Polypropylene	hr			Hour				
P	Plastic	CFG	Composite Fibreglass								
F	Fibreglass	GRN	Glass fibre reinforced nylon	NA			Not Applicable				
RCPA	Reinforced Concrete including Protective Additive	GRP	Glass fibre reinforced plastic	NA			Not Applicable				

Comments

- Models with a treatment volume less than 550 litres are authorised for use as either
 - an adjunct pre-treatment unit to an existing grease/silt water separator and must be located up-sewer from this separator; or
 - an alternative to a grease/silt water separator in circumstances where site constraints make installation of a 550 litre (minimum) grease trap inequitable or impossible.

The listed capacity is the maximum total volume of the fixtures that can be connected to the unit.
- Fitted with Taylex A300 Filter. During continuous use, the Taylex A300 Filter must be replaced with a clean decontaminated filter within a period not to exceed eight weeks. The Taylex A300 Filter removed from this infrastructure during maintenance activities must be transported off-site for decontamination and cleaning – under no circumstance should these filters be cleaned on-site and re-inserted into the infrastructure.
- Surge Control Device (SCD) is internally fitted to the trap outlet on the final retention tank.
- Access covers must be set in concrete surrounds. Internal surface may be coated with Megapoxy H. Baffles constructed of HDPE/PP. Trays constructed of SS.
- Internal surface may be coated with Megapoxy H. Baffles constructed of HDPE/PP. Trays constructed of SS.
- It is recommended the authorised Scavenger 2 unit be used within the Bio-Bizz Pty Ltd V2 Trade Waste System comprising the Scavenger 2, the Under Sink Scavenger 1b (model BBSV1B) and Floor Lock-off Bucket Trap (model BBSV3).
- The pre-treatment infrastructure is authorised for use where an appropriately sized passive grease arrester cannot be used or as an adjunct pre-treatment unit to an existing grease/silt water separator and must be located up-sewer from this separator.
- Fitted with Oliophyllic Cartridge Filter(s). During continuous use, the Oliophyllic Cartridge Filter(s) must be replaced with a clean decontaminated filter within a period not to exceed eight weeks. The cartridge filter(s) removed from the infrastructure during maintenance activities must be transported off-site for decontamination and cleaning – under no circumstance should these filters be cleaned on-site and re-inserted into the infrastructure.
- The CPS Liner System is installed into an existing grease/silt trap to extend the working life of the compliant grease/silt traps that may be compromised due to decay.
- The CPS Liner System is retrofitted into an existing 250 litre grease/silt trap to increase the capacity to 550 litres.
- The CPS Liner System is retrofitted into an existing 550 litre grease/silt trap to increase the capacity to 1000 litres.
- If installed externally, the interceptor must be protected from direct sunlight.
- Minimum 100mm thick concrete to surround sides and base of tank.
- Internal baffles can be constructed of Rotationally Moulded Polymer or concrete.
- All fixture and floor drain connections to the trap to be fitted with secure tamper proof strainer baskets.
- These companies also provide similar devices at sizes not shown on list. Devices with sizes not on the list may be authorised with a Trade Waste Consent assessed on a site by site basis. A Trade waste consent may be applied for on the Urban Utilities
