

Working beneath the streets

Oxford Street, Bulimba

April 2022

You can rely on us to keep things flowing, and from time-to-time we need to upgrade your local water and wastewater pipes.

What's happening?

Our delivery partner, Downer WSP, will soon start work on replacing sections of water pipes along Oxford Street, Bulimba between Ferry Lane and Bulimba Ferry Terminal. Construction will start on **Tuesday 3 May 2022** and we expect to be finished in six weeks, weather and site conditions permitting.

Why is this happening?

We are replacing sections of water pipe near your property; the new pipes will be longer lasting. Upgrades to the network will ensure reliability and sustainability of water services in your area.

How will impacts be managed?

Safety – barriers and signage around work areas will be in place to keep everyone safe.

Hours – most of the work will take place during the night, between **6pm and 6am, Sunday to Thursday**. In some situations, we may need to carry out works during the day, between **6am and 6pm, Monday to Friday**. We will notify you of any schedule changes as works progress.

Traffic changes – possible road, lane and footpath closures around work sites. Traffic management will be in place to look after the safety of our pedestrians, road users and to maintain local access.

Temporary water outages – we'll give you at least three days' notice before any planned water interruptions to your water supply. Keep a look out in your letterbox for these updates.

Noise, dust and minor vibrations – unfortunately there will be varying levels during excavation. We'll minimise these where we can.

Restoration – temporary restoration will occur while work is in progress. At completion, we'll restore as close to the original condition as possible including roads, driveways, footpaths and nature strips that have been impacted by our works.
