

Working beneath the streets

Granite Street, Geebung

27 May 2021

You can rely on us to keep things flowing, and from time-to-time we need to upgrade your local water and wastewater pipes.

What is happening?

Our delivery partner, Diona, will soon start work on replacing sections of water pipes along **Granite Street, Geebung**. We'll start work on **4 June 2021** and expect to be finished in **seven weeks**, weather and site conditions permitting. Work will take place on the **odd numbered** side of **Granite Street** between **Basalt Street and 45 Granite Street**, as well as on **Basalt Street between Granite Street and Delta Street**. Most of our work will be completed during the night from **6pm to 6am, Monday to Saturday**.

Why is this happening?

The pipes are reaching the end of their life cycle. We will soon start replacing sections of old water mains near your property. Upgrades to the network will ensure that we can keep moving the water to your taps. The pipes are within Council land in front of residential housing, so we will not need to enter your property.

Map of the construction area

Parking, traffic, and pedestrian access

Our work areas will be behind barriers. Please observe all site signage and barriers – they are there to keep you and our workers safe. Temporary lane/road closures and detours will be required, however, access to driveways will be maintained. Limited on-street parking will be available intermittently in work areas. Please follow traffic controller direction and signage. You may experience minor delays while we are working in front of your property. Traffic control will be

in place to assist pedestrians and general traffic around work areas.

Temporary water outages

To replace the pipes, we will need to temporarily disconnect properties while we work to transfer you to the new water main. We'll give you at least three days' notice prior to any temporary water outage. Keep a look out in your letterbox for the update.

Temporary water service

During construction, your property will be connected to a temporary water service pipe to maintain your water supply. This is the same quality of drinking water as your normal service; however, you may notice a slight reduction in water pressure. The temporary pipe is usually laid across driveways. A crossing ramp will be used to maintain safe vehicle access and protect the pipe. Please cross the ramp at slow speed without stopping to avoid damaging it. If you notice a leak or experience any issues with your temporary water pipe, please call Diona on 1300 13 13 38.

Noise and dust

The work will have elevated noise levels at times as we dig down to expose the old pipe and work to lay the new one. We will try and keep noise and any dust generated to a minimum.

Restoration

After we have completed installing each section of pipe, we will be restoring all areas impacted by our works including roads, driveways and footpaths. If your property has a non-standard driveway, e.g. Stencil, pebble, coloured. We will contact you in advance to discuss the restoration. Keep a look out in your letterbox in case we dropped by to discuss this and you weren't home.

Find out more

We'll provide further updates as the project progresses, or get in touch:

- Phone 1300 13 13 38
- Email: UUTeam@diona.com.au
