

Working beneath the streets

Kennigo Street, Spring Hill

26 May 2021

Our delivery partner, Diona, will soon start work on replacing aging sections of water pipes in your area. These upgrades will ensure the reliability of the network is maintained.

When to expect it

Diona will start works the **week commencing 31 May 2021**, and expect to be **finished by end of June 2021**, weather and site conditions permitting. This work will take place in the **middle of Kennigo Street** between **Water Street** and **Gregory Terrace**.

Our work will begin on day shifts for two days (4th and 7th June), then two night shifts (8th and 9th June 2021). Then a stand down day on the 10th June. With the remainder of our works being completed during the day from **6:30am to 5:00pm, Monday to Saturday**, weather and site conditions permitting. Night work hours are from **6pm to 5am, Monday to Saturday**.

What to expect

Traffic changes, parking, and access

There may be temporary traffic changes and detours as we complete this work. Local access will always be maintained, however we recommend you allow additional time when exiting your property, as there may be minor delays. Traffic control will be in place to assist all road users.

On-street parking will be limited on **Kennigo Street** between **Water Street** and **Gregory Terrace** for the duration of the works. Please follow traffic controller direction and signage.

A road closure will take place on **Kennigo Street** between **Water Street** and **Gregory Terrace** for the duration of the works. Local access to the street will be maintained, please follow traffic control direction and signage.

A temporary work compound will be established to store pipes, equipment, machinery, and fittings. These areas will be restored following the completion of our works.

Map of the construction area

Water servicing and outages

During construction, your property may be connected to a temporary water service pipe to maintain your water supply. This temporary pipe will may be laid across driveways – please do not park directly on the pipe and report any leaks using our contact information on the back page.

To connect your property to the temporary water service, and the new watermain once constructed, we may need to temporarily disconnect your property's water supply. We'll give you at least three days' notice prior to any temporary water outage. Keep a look out in your letterbox for the update.

Noise and dust

The work will have elevated noise levels at times as we dig down to expose the old pipe and work to lay the new one. We will try and keep noise and any dust generated to a minimum.

Restoration

After we have completed installing each section of pipe, we will be restoring all areas impacted by our works including roads, driveways, and footpaths. If your property has a non-standard driveway, e.g., Stencil, pebble, coloured. We will contact you in advance to discuss the restoration. Keep a look out in your letterbox in case we dropped by to discuss this and you were not home.
