

SEWER WORK IN YOUR AREA

Project update: upcoming night work and temporary sewage tankering in your area

What's happening?

Downer WSP and their subcontractors, have commenced **essential works to repair and upgrade the sewer pipe near Gem Road, Kenmore**. As part of this work, we will soon undertake network diversions and isolations to complete connections on the sewer pipe.

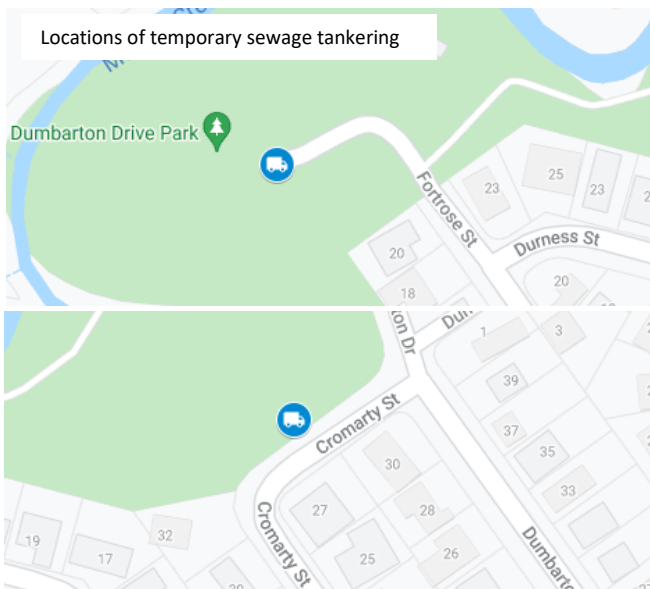

What's happening?

The flow of sewage will be removed by tankers via **Fortrose Street Pump Station** and **Cromarty Street, Kenmore** and temporarily re-directed to Oldfield Road Pump Station, Indooroopilly Road Pump Station and Karella Street, Fig Tree Pocket.

Work hours – we'll be in the area for **two days/nights**, over a two-week period, between:

- **6am Tuesday 10 August 2021 – 6am Wednesday 11 August 2021**
- **6am Tuesday 17 August 2021 – 6am Wednesday 18 August 2021**

Some of this work has been scheduled to take place after-hours due to low flow conditions at night. Construction may be rescheduled to the following night/s in the event of wet weather, site conditions and imminent covid-19 restrictions.

What can I expect?

- **Tanker trucks** positioned adjacent to the pump station and temporary discharge locations.
- **Noise, odour and idle vehicles** during wastewater transfers. Odour may occur when maintenance hole lids are removed to access the network and during pumping activities.
- **Changed traffic conditions** from vehicle movements and machinery. Some on-street parking will be unavailable at **Cromarty Street** and **Dumbarton Drive** during this time.
- **Night work** with crews, equipment, reversing beepers and safety lighting. Safety barriers will be in place to keep everyone safe.

How will the impacts be managed?

- Where possible we will limit reverse beeping noise from tankers.
- Traffic control will be in place to manage traffic flow and maintain local access.
- We will monitor odour impacts.
- We will keep you updated as the works progress through letterbox drops.

There will be no interruption to your sewer services.

Thank you for your patience while we carry out these essential works. For more information, contact **Downer WSP** on **0427 252 379** or scan the QR code to be taken to the project webpage.
