#### Comments

1. Treats batches up to 500 litres in volume.
2. For use with Busta pre-treatment system.
3. Recommended installation is with the automatic dosing system into drainage.
4. Access covers must be set in concrete surrounds. Internal surface may be coated with Megapoxy H. Baffles constructed of HDPE/PP. Trays constructed of SS.
5. Internal surface may be coated with Megapoxy H. Baffles constructed of HDPE/PP. Trays constructed of SS.
6. Access covers must be set in concrete surrounds. Internal surface may be coated with Megapoxy H. Baffles constructed of HDPE/PP. DML Lime 'Acid Pit Stone' neutralising media.
7. Internal surface may be coated with Megapoxy H. Baffles constructed of HDPE/PP. DML Lime 'Acid Pit Stone' neutralising media.
8. Infrastructure designed for use in science, medical and dental laboratories/premises as an under-sink pre-treatment unit.
9. The pH correction component of the infrastructure (hydrochloric acid dosing) is not compulsory in Brisbane.
10. The pre-treatment infrastructure is authorised for use as an adjunct pre-treatment unit to an existing grease/silt – water separator and must be located up-sewer from this separator.
11. The use of neutralising media is not compulsory. If a neutralising media is used, the trap must be sized to accommodate one hour's maximum flow as retention capacity in addition to the neutralising media's volume.
12. The pre-treatment infrastructure is authorised for use as an adjunct pre-treatment aid to an existing grease/silt – water separator.  
The use of this product does not negate the grease/silt trap sizing requirement of one hour's maximum flow as retention capacity.
13. These companies also provide similar devices at sizes not shown on list. Devices with sizes not on the list may be authorised with a Trade Waste Consent assessed on a site by site basis.  
A Trade waste consent may be applied for on the Urban Utilities Web Site
14. Requires the use of bag filters.
15. Motar test block not required by Queensland Urban Utilities.
