## Project Update: Construction works at Esk Reservoir

### What's happening?

Our delivery partner, **Diona**, are currently completing ongoing construction works for installation of a new water reservoir at **104 Highland Street, Esk**. Construction has been progressing well, with most of the external pipe and valve connection works completed.

### What's next?

Reservoir tank construction has now commenced. Works will mainly be carried out during the day, Monday to Friday, but from time-to-time Saturday works may be required. Intermittent Saturday works will commence from **Saturday 2 November 2024** as required to meet our estimated project completion in **June 2025**, weather and site conditions permitting.

**Works hours:** between **6:30am** and **5:00pm**, **Monday to Friday** and intermittent **Saturdays 6:30am to 3:00pm**.

### What to expect:

- **Crews, trucks and equipment** on the footpath and road. Safety barriers will be in place to keep everyone safe as required.
- **Noise/dust.** Residents may experience varying levels of noise and dust from construction activities. We'll minimise these where we can.
- **Changed traffic conditions** including lane and road closures may be in place. Traffic controllers will be on-site to look after the safety of road users and pedestrians.
- **Restoration.** On completion of works, we will restore all work areas as close as possible to the original condition.

We thank you for your patience during this important work.
