

Cannery Creek Sewer Upgrade Project

10 January 2024

Cannery Creek project update

Urban Utilities is delivering this project in partnership with Fulton Hogan Utilities and will progress in stages due to working in and around a waterway.

The project team is excited for the new year to recommence the delivery of this sewer upgrade project. The civil contractor will mobilise to the Station Avenue site compound in mid-January and begin transporting their equipment and material to start the trenching and installing the new rising sewer main along Cannery Creek in late January.

Truck route

Truck route:

Due to the size of some vehicles required to enter and exit the project alignment, the following roads will likely be utilized: Station Avenue, Carter Street, Junior Terrace, Coulter Crescent, Ferguson Avenue, O'Farrell Avenue, and Oates Parade. Refer to the map overleaf.

Station Avenue closure:

As a reminder, Station Avenue will close at 7.00am on Thursday, 11 January 2024. We thank you for your continued patience with the closure of Station Avenue, as we understand the closure may be an inconvenience. The project team will endeavour to minimise the duration of the road closure and will advise on the progress of the project moving forward.

Work hours:

Site construction hours are from 6.30am to 6.30pm subject to weather and site conditions.

Contact the project team:

Let us know how you would like to be kept informed about the construction activities by contacting the project team on **1800 573 215** or
